

twix

Il modulo UltraShield

La collezione UltraShield dà il benvenuto a Twix, il nuovo modulo di rivestimento indoor&outdoor per pareti e controsoffitti.

Twix è composto di un nucleo robusto avvolto da uno scudo protettivo che conferisce al rivestimento della parete colori e trame imbattibili e un elevatissimo livello di resistenza alle macchie e ai raggi solari.

Twix è adatto per essere utilizzato in ambienti outdoor e indoor, con montaggio sia orizzontale che verticale.

OUTDOOR / INDOOR

UltraShield module

The UltraShield collection welcomes Twix, the new indoor and outdoor covering module for walls and false ceilings.

Twix is composed of a robust core enveloped by a protective shield that gives the walls covering unbeatable colours and textures, alongside an exceptionally high level of resistance to staining and sunlight.

Twix can be installed either horizontally or vertically.
